HORIZONTAL, SEALLESS PP AND PVDF CENTRIFUGAL PUMP WITH PERMANENT MAGNET DRIVE SYSTEM, NO MECHANICAL SEAL

CM MAG-P Series

The separation of liquid chamber/atmosphere by means of an isolation shell is the best solution to pump aggressive chemical, high purity liquids and liquids difficult to seal.

Hermetic sealless injection moulded thermoplastic pumps are the best solution for lght duty applications.

A wide range of pumps covers the different performances.

PUMP DETAILS

Making a comparison between this range of pumps and the other two M PUMPS series C MAG-P and C MAG-PL, the correct definition becomes few components (extremely easy maintenance), competitive prices, guaranteed chemical compatibility.

Pump casing shall be one single piece, injection moulded designs, made of GFR PP and CFR PVDF.

RWP QUICK CHANGE CARTRIDGE KIT

to guarantee an easy and fast maintenance, materials $\ensuremath{\mathsf{PP}}$ and $\ensuremath{\mathsf{PVDF}}$.

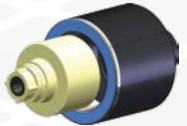

The sealing system with O-Rings prevents from leaking in the atmosphere – different materials available:

- EPDM - VITON®

The rear shell is made of thermoplastic materials, ellipsoidal profile, zero magnetic losses, GFR PP or CFR PVDF materials.

High power synchronous magnetic coupling designed by our Technical Office and with magnetic elements mechanically locked.

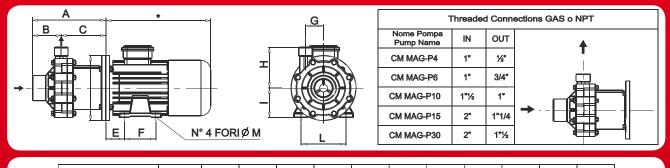

Rare earth guarantee the magnetic-balancing to avoid the thrust bearings wear and the heat generation.

Field assembling of the product lubricated bearing arrangement does not require special tools. The Shaft / Bearing materials are available in two different configurations to provide the best solution for each application:

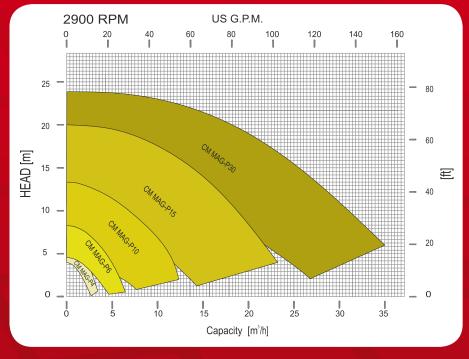

- PTFEC – ALLUMINA 99,7% (standard) - CARBON – ALLUMINA 99,7%

| CM MAG-P30 | 100/112 | 296 | 91 | 205 | 250 | 63 | 140 | 66.5 | 140 | 100 | 160 | 12 |

Performance curves

Pump construction and Operative Limits

Close-coupled drivers are conventional drivers mounted directly to pumps frame. No base, coupling or guards are required for this mounting style.

- Connections: Threaded BSP (GAS) & NPT.
- Max viscosity: 200 cSt
- Max system pressure: 5 bar
- Flow up: to 35mc/h
- Head up: to 23 m
- Temperature range: from 24 °F (-5 °C) to +194 °F (+90 °C)
- Electric motors from 1,5Kw up to 5kW
